Whether You Are Awaiting an Autism Diagnosis for Your Child, or Already Have One - We are Here to Support You

Applied Behavior Analysis (ABA) is a scientifically validated approach proven to effectively teach skills and reduce stigmatizing behavior. In many states, including New Jersey, ABA is deemed "medically necessary" for persons with autism.

ABA intervention packages should include programs for teaching language, play, social skills, self-care, and more. ABA treatment should always be custom designed by a Board Certified Behavior Analyst (BCBA), who oversees the ABA instructor delivering the treatment during regularly scheduled sessions.

Rinn ABA Consulting is a family-owned professional practice that provides high-quality autism treatment. Our interventions are grounded in the science of ABA, and are carefully planned, implemented, and analyzed. Our strategies are innovative, highly effective, and practical for parents to use.

Rinn ABA uses a systematic process when introducing treatment which focuses first on building a warm and fun-filled relationship with the child. We then work to establish cooperation, allowing for faster learning and fewer tears.

With our experienced staff and proven techniques, parents quickly feel a renewed sense of confidence, control and optimism.

Rinn ABA benefits include:

- Full-time staff rigorously trained and evaluated quarterly
- Developers of the innovative ABA learning curriculum: Rinn Rise & Shine
- 100% of Rinn ABA clients are pleased (33%) or are very pleased (67%) and would recommend our service to a family member or friend in need*
